Sirenusa

Estate Enighed

St. John, USVI, 00830

Dear David,

Thank you for allowing TERMINIX to provide a proposal for powder post beetle treatment for Sirenusa. In order to protect your kitchens, we need to do a fumigation using Methyl Bromide. Because of its effectiveness, we can offer a one-year warranty for this treatment.

The price to fumigate your Units is as follows:

Unit H, Upper \$ 2,200.00 Unit H, Lower \$ 2,200.00 Unit I, Lower \$ 2,200.00 Unit J, Lower \$ 2,800.00

TOTAL \$ 9,400.00

This price includes all materials needed to complete the fumigation of all three (4) Units. Currently, we are scheduling jobs about two (2) weeks from approval. To schedule fumigation work, we require a fifty (50%) percent deposit with a balance due upon completion.

We look forward to your approval. If you have any questions, please call. Thank you.

Sincerely,

Thomas J. McGrath,

Field Inspector 340-642-7378
